

Scientific programme

Monday 27 August

Session 07. Entire male pigs and immunocastration as alternatives to surgical castration of male piglets: opportunities and drawbacks (part 1) (with COST Action IPEMA)

Room: Olipa 3

Chair: G. Bee / M. Čandek-Potokar

Session type: Project session

Theatre Session 07		Book of Abstracts page
8:30	Pork production with entire males and immunocastrates in Australia	144
invited	<i>D.N. D'Souza, R.J.E. Hewitt and R.J. Van Barneveld</i>	
9:00	Pork production with entire males and immunocastrates in South America	144
invited	<i>J.V. Peloso</i>	
9:30	Whole chain approach for moving from surgical castrate to entire male production	145
	<i>G.B.C. Backus</i>	
9:45	Genetic approaches for rearing entire males	145
	<i>C. Larzul, L. Fontanesi, E. Tholen and M. Van Son</i>	
10:00	Effect of divergent selection for cortisol level on boar taint	146
	<i>C. Larzul, E. Terenina, Y. Billon, L. Gress, R. Comte, A. Prunier and P. Mormede</i>	
10:15	Coffee break	
10:45	Genome-wide DNA methylation analysis reveals candidate epigenetic biomarkers of boar taint in pigs	146
	<i>X. Wang, M. Drag and H.N. Kadarmideen</i>	
11:00	Mining whole genome resequencing data to identify functional mutations in boar taint-candidate genes	147
	<i>G. Schiavo, S. Bovo, S. Cheloni, A. Ribani, C. Geraci, M. Gallo, G. Etherington, F. Di Palma and L. Fontanesi</i>	
11:15	The lysine requirement of growing entire male pigs (10-15 weeks of age): a dose-response study	147
	<i>S. Millet, M. Aluwé, J. De Sutter, W. Lambert, B. Ampe and S. De Campeneere</i>	
11:30	Development of long-term, pre-finishing immunocastration protocols for male Iberian pigs: 1. Efficacy	148
	<i>F.I. Hernández-García, M. Izquierdo, M.A. Pérez, A.I. Del Rosario, N. Garrido and A. Montero</i>	
11:45	Increasing levels of condensed tannins from Sainfoin may reduce the environmental impact of pigs	148
	<i>E. Seoni, G. Battacone, F. Dohme-Meier and G. Bee</i>	
12:00	Testicular development, sex hormones and boar taint in pig lines divergent for residual feed intake	149
	<i>A. Prunier, Y. Billon, J. Ruesche, S. Ferchaud and H. Gilbert</i>	
Poster Session 07		Book of Abstracts page
07.12	Genetic determinism of boar taint and relationship with meat traits	149
	<i>C. Dugué, A. Prunier, M.J. Mercat, M. Monziols, B. Blanchet and C. Larzul</i>	

07.13	Genetic analysis of boar taint and fertility traits including hormone profiles in dam lines <i>I. Brinke, K. Roth, M.J. Pröll, C. Große-Brinkhaus, I. Schiefler, K. Schellander and E. Tholen</i>	150
07.14	Boar taint and hormonal development in immunocastrated pigs of 3 breeds <i>E. Heyrman, L. Vanhaecke, S. Millet, F. Tuytens, S. Janssens, N. Buys, J. Wauters and M. Aluwé</i>	150
07.15	Influence of terminal sire on fattening traits of pigs of four genders <i>G. Kušec, I. Djurkin Kušec, M. Škrlep, K. Gvozdanović and V. Margeta</i>	151

Session 17. Entire male pigs and immunocastration as alternatives to surgical castration of male piglets: opportunities and drawbacks (part 2) (with COST Action IPEMA)

Room: Olipa 3

Chair: G. Bee / M. Čandek-Potokar

Session type: Project session

	Theatre Session 17	Book of Abstracts page
14:00	Weight of sex glands as an on line tool to discriminate entire males from immunocastrates <i>N. Batorek Lukač, G. Fazarinc, M. Prevolnik-Povše, M. Škrlep and M. Čandek-Potokar</i>	228
14:15	Health and welfare issues regarding surgical castration of male piglets and its alternatives <i>E. Von Borell, A. Prunier and U. Weiler</i>	228
14:30	Finishing heavy boars for lower taint, suitable welfare and optimal performance <i>L. Martin, A. Frias, R.P.R. Da Costa, M.A.P. Conceição, R. Cordeiro and A. Ramos</i>	229
14:45	Pork production with immunocastration: welfare and environment <i>V. Stefanski, E. Labussière, S. Millet and U. Weiler</i>	229
15:00	Immunocastration, avoiding teeth clipping and tail docking improve piglets' production and welfare <i>L. Morgan, E. Klement, L. Koren, J. Meyer, D. Matas, S. Novak, L. Golda, Y. Cohen, W. Abu Ahmad and T. Raz</i>	230
15:15	Behavioural response to an intermittent stressor is higher in entire compared to castrated male pigs <i>M. Holinger, B. Früh, P. Stoll, M. Kreuzer, R. Graage, A. Prunier and E. Hillmann</i>	230
15:30	Meat quality issues in entire male and immunocastrated pigs <i>M. Škrlep and M. Čandek-Potokar</i>	231
15:45 Coffee break		
16:15	Comparison of muscle proteome profile between entire males and surgically castrated pigs <i>K. Poklukar, M. Škrlep, U. Tomažin, N. Batorek Lukač and M. Čandek-Potokar</i>	231
16:30	Quality control in entire male pig production with particular emphasis on boar taint detection <i>M. Font-I-Furnols, M. Čandek-Potokar, N. Panella-Riera, J.-E. Haugen and I. Bahelka</i>	232
16:45	Fully automated and rapid at-line method for measuring boar taint related compounds in back fat <i>C. Borggaard, R.I.D. Birkler, S. Støier and B. Lund</i>	232
17:00	Raising entire male pigs: a framework for sensory quality control <i>D. Moerlein</i>	233

17:15	Citizen attitudes and consumer acceptability towards meat from boars and immunocastrates in Europe <i>M. Aluwé, L. Tudoreanu, L. Lin, A.R.H. Fischer and M. Font I Furnols</i>	233
17:30	Consumer's opinion on animal welfare and pig castration in Croatia <i>I. Djurkin Kusec, G. Kusec, L. Guerrero, M. Font-I-Furnols and I. Tomasevic</i>	234
17:45	Consumer expectations towards meat from castrated and immunocastrated pigs: a segmentation approach <i>A. Claret, L. Guerrero, M. Font-I-Furnols and A. Dalmau</i>	234

Poster Session 17

Book of Abstracts page

17.15	Quality of pig carcasses of surgical- and immunocastrated males slaughtered at different live weight <i>M. Povod, O. Kravchenko, A. Getya and O. Kodak</i>	235
17.16	Influence of housing conditions on antibody formation and testosterone after Improvac vaccinations <i>K. Kress, U. Weiler and V. Stefanski</i>	235
17.17	Effect of immunocastration on performance and fresh ham quality of heavy gilts <i>D. Martin, C. Carrasco, M. Hebrero, M. Nieto, A. Fuentetaja and J. Peinado</i>	236
17.18	Consumer's attitudes towards surgical castration of pigs in three Western Balkan countries <i>I. Tomasevic, S. Novakovic, I. Djekic, D. Nakov, L. Guerrero and M. Font-I-Furnols</i>	236
17.19	Quality and sensory evaluation of meat from entire males after adding hydrolysable tannins to diet <i>I. Bahelka, O. Bučko and E. Hanusová</i>	237
17.20	About analysis of boar taint compounds in meat compared to subcutaneous fat <i>S. Ampuero Kragten and G. Bee</i>	237
17.21	Sex neutralization of heavy pigs from Iberian Peninsula breeds: solutions and limitations <i>R. Charneca, F.I. Hernández-García and M. Izquierdo</i>	238
17.22	Effect of essential oil addition on masking boar taint in fresh pork sausage <i>B. Šojić, V. Tomović, P. Ikončić, B. Pavlič, N. Džinić, N. Batorek-Lukač and I. Tomašević</i>	238
17.23	Characterisation of eQTLs associated with androstenone, skatole and indole in porcine testis <i>M. Drag, L.J.A. Kogelman, H. Maribo, L. Meinert, P.D. Thomsen and H.N. Kadarmideen</i>	239
17.24	Boar taint and meat quality characteristics of entire male and surgically castrated male pigs <i>I.G. Penchev, S. Ribarski and T. Stoyanchev</i>	239
17.25	Retrospective by sex of the new EU lean meat content of pig carcasses <i>G. Daumas</i>	240
17.26	Sensory analysis of cooked ham from entire pigs raised with different feeding and housing conditions <i>R. Pinto, N. Reis, C. Barbosa, R. Pinheiro and M. Vaz Velho</i>	240
17.27	Effect of the method of castration on growth performance and boar taint <i>K. Zadinova, R. Stupka, J. Citek and N. Lebedova</i>	241
